RESEARCH/EVIDENCED BASED PRACTICE

Dennis, V. 2022: Developed practical roadmap starting with a gap analysis and QI project, followed by drafting policies aligned with best practices, setting up training, and engaging interdisciplinary teams (including risk and occupational health stakeholders) to drive adoption and sustain cultural change. Utilizing essential evidence based practice and standard care to support legislation, whereas law went into effect in Georgia. Case studies of hospitals or surgical centers that implemented the smoke-evacuation program were utilized.

Dennis, V. 2017: Capstone Research for MSN program. Evidence-Based Practice and Technology for Nursing: Clinical Issues Associate with Surgical Smoke.

Dennis, V. 1988 to present: Laser & Electrosurgery Safety in establishing best practices and national standards for the safe use of lasers and electrosurgical devices and was the expert reviewer AORN Recommended Practices/Guidelines for Lasers, contributed to ANSI standards, and with the ANSI Z136.3 standards, both are the international standard for safe use of lasers in health care environments.

Dennis, V. 1986: In-depth research study on the ultra-filtration factors with artificial kidneys. Presented at the American Association of Nephrology Nurses in Washington, D.C. (Certified Clinical Hemodialysis Nurse).
